WE HOPE YOU FIND THIS CATALOG OF INTEREST AND ASSISTANCE!

In this catalog, we have tried to illustrate as accurately as possible the many different sizes and styles of Pattern and Tablet letters which we manufacture. If you cannot find the exact style you require, we suggest you forward a few sample letters if possible—the styles sometimes vary among the various manufacturers, and there are many styles which appear to be very similar in shape.

Whatever your requirements—large or small—in the way of cast metal letters, we hope you will remember us the next time you order.

A WORD ABOUT OUR PRODUCTION FACILITIES . . . .
The majority of our Pattern and Tablet letters, as well as our Foundry Trademarks, are cast in engraved metal dies, and these dies in turn, are machine engraved from large master copy to assure uniform shape throughout the various sizes. Because of this exclusive process, we are able to manufacture letters that are clean and uniform, and most important, will always remain accurate from year to year.

. . . remember to specify the only true DIE CAST letters

Trademarks, Monograms

Foundry Trademarks and Monograms identify your castings to facilitate the purchase of replacement parts, and to distinguish your particular castings from those of other foundries. Available in any size, all white metal Trademarks and Monograms are cast in our special engraved metal dies to assure clean, always uniform castings. Brass and aluminum Trademarks and Monograms are made from engraved patterns to give you a smooth, accurate casting.

We can reproduce registered Trademarks; we can work from your rough sketches; or we will be glad to offer our suggestions and recommendations. A wide variety of samples are available to assist you in developing a suitable Trademark or Monogram for your company.

CUSTOMER COMMENTS ABOUT OUR SERVICE AND OUR PRODUCTS:

"Frankly, it is not often that we can sincerely write to any of our suppliers and compliment them on the fact that they have really done an outstanding job with reference to delivery, but in this case we feel you have given us excellent service."
The Parkersburg Rig & Reel Co.

"It is a pleasure to do business with you knowing quality of material you ship and service you render."
The R. D. Cole Manufacturing Co.

"Thank you again for your prompt service."
Zirkle Pattern Works

"I believe you are doing a good job."
Acme Brick Company

"Thank you for your kindness in attending to this order so promptly."
Peterson Pattern Works

MEASURING

Over the years, many styles of letters have been developed by various manufacturers using different production methods and specifications, with the result that no standard measuring system exists.

When ordering Pattern and Tablet letters, it is therefore important to use the proper measuring method, particularly in the case of Sharp Face Gothic and similar styles having considerable draft, or bevel, on the sides of the letters. For example, a 1¾" Sharp Face letter actually measures 2" overall on the back.

Throughout the catalog, we have listed with each style, the correct method to use in determining the size required, and have referred to the drawings shown below.
